

## Model : High Speed Conveyor Belt Type

### Application

Modular belt type detector specially design and made for products in bottle, can, stand-up bag etc. to detect mettalic impurities in pack or product. Modular belt is easy to clean,transmit heavy product, be suitable for dry or wet product. It could be well-connected with production line by the signal input/outpur port.

### Technical Specification

Model -----	<b>AC-RMB-BS</b>
Item -----	<b>Metal detector for bottle-shaped products</b>
displayer -----	<b>Touch screen</b>
Detecting tunnel (W*H in mm) -----	<b>150×250</b> Height of detecting tunnel could be customized.
Passing through area (W*H in mm) ----	<b>100×215</b>
Machine sensitivity Fe (in mm) -----	<b>Ø1.5</b>
Machine sensitivity Sus (in mm) -----	<b>Ø2.0</b>
Actual sensitivity -----	<b>Depends on product effect of its own</b>
Output mode -----	<b>Sound and light alarm ; Flipper</b>
