

Model : Combined metal detector or weight checker

Application

AC-MDC series is a combined unit for metal and weight detection. Compact design, with two rejecting arms for respectively detecting metallic impurities and weight of product. It's the best solution for online metal and weight detection.

Technical Specification

Weight -----	about 160kg
Power -----	350w
Conveyor belt speed -----	10-45m/min
Passing through area (W*H in mm) ----	280mm(width)*150mm(height)
packing length -----	<350mm
detecting accuracy -----	FE 1.0mm, SUS 2.0mm
sorting accuracy -----	+_0.5g weighing range: 5 g-900g
