

Capacity : 200 - 500 kg/h

**SAM-PF/AF**

## Pet Food/Treats/ Animal Feed Line

This Processing line is specially designed to produce pet daily food & treats, also animal feed for every kinds of animal. Normally using grains powder as main material mixing with meat, bones powder, fish powder as a flavouring. Through adopting preconditioning system for raw material it can increase capacity & reduce power consumption. This line would satisfy different demands for capacity & quality. At the same time we focus on palatability & scientific nutritional proportion which make pet food more easily digested & absorbed.

## PRODUCTION PROCESSING LINE

Mixer → Automatic feeder Twin screw extruder →  
Extruder → Cooling vibration → Air conveyor →  
Dryer → Large elevator → Oil spraying →  
Flavouring Line → Cooling conveyor
