

## SAM-DTCC

### Doritos & Tortilla & Corn Chip Line

Doritos was produced since 1964 and sold all over the world. The main raw material is corn powder, the mixture is heated under pressure, and then extruded through a die, then use the shaper to make the texture of the snack is formed as a result of contact with hot air, causing steam in the mixture to expand and creating its characteristic texture. After frying, the product is then tumbled with the desired flavor components.

## Production Process Line

Mixer → Automatic Feeder → Twin Screw Extruder → Pulling & Flaking Machine Compound Shaper → Z-Shape Conveyor Sifter → Continuous Fryer → Vibration Machine → Elevator → De-Oiler → Flavoring Line
